

# Contents

## Executive Summary

## Section 1 Introduction

1.1	Report Objectives.....	1-1
1.2	Report Organization.....	1-2

## Section 2 Site Description

## Section 3 Problem Formulation

3.1	Stressor Identification.....	3-1
3.2	Ecological Resources Potentially at Risk.....	3-2
3.2.1	Habitat Descriptions.....	3-2
3.2.2	Impacts to Ecological Resources.....	3-5
3.2.3	Identification of Potential Receptors.....	3-5
3.3	Identification of Endpoints.....	3-7
3.3.1	Assessment Endpoints.....	3-7
3.3.2	Measurement Endpoints.....	3-9
3.4	Site Conceptual Exposure Model.....	3-9
3.5	Uncertainties – Problem Formulation.....	3-11

## Section 4 Analysis Phase

4.1	Ecological Exposure Assessment.....	4-1
4.1.1	Exposure Profiles – PCBs.....	4-1
4.1.2	Exposure Profiles – Nonchemical Stressors.....	4-4
4.1.3	Exposure Scenarios.....	4-4
4.1.4	Exposure Analysis.....	4-8
4.1.5	Food Web/Food Chain Modeling.....	4-9
4.1.6	Uncertainty Evaluation – Exposure Assessment.....	4-25
4.2	Ecological Effects Assessment.....	4-28
4.2.1	Evaluation of Effects Data.....	4-28
4.2.2	Stressor-Response Profiles.....	4-34
4.2.3	Uncertainty Evaluation – Effects Assessment.....	4-35

## Section 5 Risk Characterization

5.1	Risks from Chemical Stressors.....	5-2
5.1.1	Risk from PCBs in Surface Water (direct contact).....	5-2
5.1.2	Risks from PCBs in Streambed Sediment (direct contact).....	5-3
5.1.3	Risks from PCBs in Floodplain Sediment and Surface Soil (direct contact).....	5-4
5.1.4	Risks from PCBs in Food Items (Ingestion).....	5-5

5.1.5	Reproductive Risks to Birds (Bird Egg Data) .....	5-9
5.1.6	Sitewide Summary of Risks.....	5-10
5.2	Risks from Nonchemical Stressors .....	5-11
5.3	Risk Summary and Ecological Significance.....	5-12
5.3.1	Risk Summary.....	5-12
5.3.2	Other Supporting Information .....	5-13
5.4	Uncertainty Evaluation – Risk Characterization .....	5-16
5.5	Remediation Issues.....	5-18
5.5.1	Summary of Recommended Cleanup Values .....	5-20

## Section 6 References

## Appendices

- Appendix A* Lists of Plant and Animal Species Present or Potentially Present at the Kalamazoo River Superfund Site
- Appendix B* Exposure-Related Data for Representative Receptors
- Appendix C* PCB Food Web Model Kalamazoo River Superfund Site
- Appendix D* EPA Region 5 Recommended Avian and Mink PCB Toxicity Reference Values

# Figures

- 2-1 Kalamazoo River Ecological Risk Assessment Study Area
- 3-1 Observed PCB Concentrations in Aquatic & Terrestrial Media – Upstream Reference Area Near Battle Creek - ABSA 1 and TBSA 11 Study Areas
- 3-2 Observed PCB Concentrations in Aquatic Media – Morrow Lake Area - ABSAs 2 and 3 Study Areas
- 3-3 Observed PCB Concentrations in Aquatic Media – Mosel Avenue Area - ABSA 3 and 4 Study Areas
- 3-4 Observed PCB Concentrations in Aquatic & Terrestrial Media – Upstream of Plainwell Dam - ABSAs 4,5 and TBSAs 8, 9, and 10 Study Areas
- 3-5 Observed PCB Concentrations in Aquatic & Terrestrial Media Between Otsego City Dam and Plainwell Dam – ABSAs 5,6 and TBSA 10 Study Areas
- 3-6 Observed PCB Concentrations in Aquatic & Terrestrial Media – Trowbridge Dam Area Upstream to Otsego - ABSAs 7,8 and TBSAs 3 and 5 Study Areas
- 3-7 Observed PCB Concentrations in Aquatic Media – Lake Allegan - ABSA 9 Study Area
- 3-8 Observed PCB Concentrations in Aquatic & Terrestrial Media Downstream of Allegan Dam - ABSA 10 and TBSA 1 Study Area
- 3-9 Observed PCB Concentrations in Aquatic Media – Pottowatamie Marsh Area - ABSA 11 Study Area
- 3-10 Observed PCB Concentrations in Aquatic & Terrestrial – Portage Creek Area - ABSA 12 Study Area
- 3-11 Potential Exposure Scenarios - Site Conceptual Model
- 4-1 U95 Total PCB Concentrations in Fish, SW, and SED
- 4-2 Primary Pathways for Aquatic and Terrestrial Organisms
- 5-1 Total PCB Concentrations – Thresholds/Criteria API/PC/KR Surface Water
- 5-2 Total PCB Concentrations – Thresholds – PRGs API/PC/KR Instream Sediment
- 5-3 Total PCB Concentrations – PRGs API/PC/KR FP SED/SS (Terrestrial/Floodplain Exposures)
- 5-4 Total PCB Concentrations – PRGs API/PC/KR FP TBSA Surface Soil (Terrestrial Exposures)
- 5-5 Maximum Total PCB Concentrations in Terrestrial Biota
- 5-6 U95 Whole Body Total PCB Concentrations in Fish
- 5-7 Smallmouth Bass Whole Body Total PCB Concentrations
- 5-8 Common Carp Whole Body Total PCB Concentrations
- 5-9 Sucker Whole Body Total PCB Concentrations
- 5-10 Total PCB Concentrations Muskrat Carcass
- 5-11 Total PCB Concentrations Muskrat Liver
- 5-12 Total PCB Concentrations Mink Carcass
- 5-13 Total PCB Concentrations Mink Liver

# Tables

3-1	Polychlorinated Biphenyls (PCBs) Detected in Abiotic and Biological Samples
3-2	Biological Study Areas
3-3	Assessment and Measurement Endpoints and ERA Null Hypotheses
4-1	Sitewide Concentrations in Abiotic Media
4-2	Exposure Profile for PCBs - Chemical Properties
4-3	Exposure Information for Representative Ecological Receptors
4-4	Potential Exposure via Contaminant Ingestion Pathway for Representative Aquatic and Terrestrial Organisms
4-5a	Concentration and Distribution of Total PCBs in Sampled Biota and Abiotic Media
4-5b	Concentration and Distribution of Total PCBs in Bird Eggs
4-6	Measured Soil-to-Terrestrial Plant BAFs for PCBs (garden plot data, ABSA 8, 2000)
4-7	Literature-Based Soil-to-Terrestrial Plant BAFs for PCBs
4-8	Calculated Aquatic BCFs/BSAFs and Terrestrial BAFs for Representative Food Web Species (based on primary exposure media)
4-9	Adverse Effects Associated with Bird Egg PCB Concentrations
4-10	PCB Stressor-Response Profiles
5-1	Summary of the PCB Food Web Model, Terrestrial Species
5-2	PRGs for PCBs in FP Sediment/Surface Soil for Representative Terrestrial Food Web Species
5-3	Summary of Total PCB Risks to Ecological Receptors
5-4a	Hazard Quotients for Birds Eggs – Egg TRVs from Table 4-9
5-4b	Hazard Quotients for Birds Eggs – Egg TRVs from Appendix D (chicken studies)
5-5	Media-Specific and Species-Specific Levels of Protection
